## WHAT IS THIS PRODUCT?

**Type:** Undertakings for the Collective Investment in Transferable Securities (UCITS)

**Product Term:** Recommended minimum holding period: 5 year(s)

**Objective:** The investment objective of the Fund is to achieve long-term capital growth. The Fund will invest primarily in U.S. small capitalization equities which the Sub-Investment Manager defines as being within the same market capitalization range as those included in the Russell 2000 Growth Total Return Index (positions may include mid and large cap stocks). The Fund seeks to achieve its investment objective by applying a bottom-up fundamental research strategy to select long and/or short positions in equities issued by companies across all industry sectors. For the avoidance of doubt, any short exposure will only be achieved synthetically (i.e. through the use of FDIs). The Fund may sell securities short as appropriate for speculative purposes. The Fund is actively managed which means that the Sub-Investment Manager is actively making investment decisions for the Fund. The Fund is not managed by reference to any benchmark. Additional information is detailed in the Prospectus: <https://www.heptagon-capital.com/documents/prospectus>.

**Intended Retail Investor:** The intended investor of this Fund should have basic knowledge of relevant financial instruments.

## WHAT ARE THE RISKS & WHAT COULD I GET IN RETURN?

### Risk Indicator

Lower Risk ← Higher Risk

**The risk indicator assumes you keep the product for 5 year(s). This product has no maturity date.**

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are very likely to impact our capacity to pay you.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the risk indicator shown.

This Fund does not include any protection from future market performance so you **could lose some or all of your investment**. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

Additional risks are detailed in the Prospectus. This list does not purport to be exhaustive and risks of an exceptional nature may arise from time to time.

## WHAT ARE THE RISKS & WHAT COULD I GET IN RETURN? (CONTINUED)

### Performance Scenarios

The scenarios shown illustrate how your investment could perform over the next 5 years assuming you invest \$10,000.00. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

**Recommended minimum holding period: 5 year(s)**

**Investment = \$10,000**

Scenarios		1 year	5 years
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress scenario</b>	<b>What you might get back after costs</b>	<b>\$4,960</b>	<b>\$4,740</b>
	Average return each year %	-50.4%	-13.9%
<b>Unfavourable scenario</b>	<b>What you might get back after costs</b>	<b>\$8,730</b>	<b>\$9,500</b>
	Average return each year %	-12.7%	-1.0%
<b>Moderate scenario</b>	<b>What you might get back after costs</b>	<b>\$10,230</b>	<b>\$12,160</b>
	Average return each year %	2.3%	4.0%
<b>Favourable scenario</b>	<b>What you might get back after costs</b>	<b>\$15,040</b>	<b>\$16,230</b>
	Average return each year %	50.4%	10.2%

If the share class has not yet launched or does not have ten years of performance, a benchmark or proxy will be used. Please reach out to the Heptagon team at <https://www.heptagon-capital.com/contact> for more information.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The Fund does not include any protection from future market performance so you could lose some of all of your investment.

### WHAT HAPPENS IF THE ICAV IS UNABLE TO PAY OUT?

The ICAV is not required to make any payment to you in respect of your investment. If the ICAV was liquidated, you would be entitled to receive a distribution equal to your share of the ICAV's assets, after payment of all of its creditors. The ICAV has no obligation to make any payment to you in respect of the ordinary shares. There is no compensation or guarantee scheme in place that applies to the ICAV and, if you invest in the ICAV you should be prepared to assume the risk that you could lose all of your investment. The Fund's assets are in the safekeeping of the Depositary that is required by law and regulation to segregate its own assets from the assets of the Fund. If the Depositary becomes insolvent, the financial loss should be mitigated to a certain extent.

### WHAT ARE THE COSTS?

The Reduction in Yield ("RIY") shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for two different holding periods. The figures assume you invest \$10,000. The figures are estimates and may change in the future. The person selling you or advising you about this product may charge you other costs, if so, this person will provide you with interpretation about these costs and show you the impact that all costs will have on your investment over time.
