\*A sub-fund of Heptagon Fund ICAV

The Fund has been classified as an Article 8 for the purposes of the EU's Sustainable Finance Disclosure Regulation. Please see [Prospectus](#) for further information on the Fund's environmental and/or social characteristics and relevant sustainability risks.

Heptagon Capital, 63 Brook Street, Mayfair, London W1K 4HS  
Tel: +44 20 7070 1800  
(FRN 403304)

Authorised & Regulated by the Financial Conduct Authority  
12 Endeavour Square, London, E20 1JN

# IMPORTANT INFORMATION

The following presentation provides information on the Driehaus Emerging Markets Sustainable Equity Fund (the “Fund”), a sub-fund of Heptagon Fund ICAV which is an open-ended umbrella type investment vehicle authorised pursuant to UCITS regulations. Heptagon Capital Limited (“Heptagon”) is the Investment Manager and Driehaus Capital Management LLC (“Driehaus”) is the Sub-Investment Manager meaning Driehaus exercises discretionary investment authority over the Fund. Driehaus was appointed Sub-Investment Manager of the Fund on 06.12.2016, prior to this OFI Global Institutional, Inc. was the Sub-Investment Manager from 25.06.2012 to 05.12.2016.

**Please note that the Driehaus Emerging Markets Equity Fund changed to the Driehaus Emerging Markets Sustainable Equity Fund on 01.10.2020, on which date Environmental, Social and Governance (“ESG”) criteria were formally implemented into the investment process.**

The portfolio management team at Driehaus has been managing its Emerging Markets Equity Strategy since 1997 and has recently expanded to include the Emerging Markets Sustainable Equity Strategy. The Fund has the same Portfolio Managers and investment team, the same investment objective and uses the same philosophy and strategy as the Driehaus Emerging Markets Sustainable Equity Strategy. Since the Fund has a relatively short time period, the following presentation makes extensive reference to the Driehaus Emerging Markets Growth Composite (“Composite” or “Driehaus Emerging Markets Composite”) to provide a better understanding of how the team has managed the Driehaus Emerging Markets Growth strategy over a longer time period. The Composite presented includes all unleveraged “emerging markets growth accounts” over which Driehaus exercises discretionary investment authority of both cash and equities using the same investment objective and philosophy (this includes the Fund, any segregated accounts under Driehaus’ management and Driehaus’ US mutual fund). The Composite was created on 01.01.1997, however performance data is presented since 01.01.2008 since the current Portfolio Manager has been in place since then. As of 01.10.2020 the Composite no longer includes the Fund and a new composite has been created, the Driehaus Emerging Markets Sustainable Equity Strategy (the “Emerging Markets Sustainable Equity Strategy”), which is currently comprised of the Driehaus Emerging Markets Sustainable Equity Fund.

Driehaus manages the Fund according to the same investment principles, philosophy and execution of approach as those used for the Emerging Markets Sustainable Equity Strategy, however it should be noted that due to certain factors including, but not limited to, differences in cash flows, fees, expenses, performance calculation methods, and portfolio sizes and composition, there may be variances between the investment returns demonstrated by each portfolio in the future.

For the same reason, although the following presentation makes extensive reference to the performance of Driehaus’ Emerging Markets Sustainable Equity Strategy, the data for the Emerging Markets Sustainable Equity Strategy is provided purely for indicative purposes to demonstrate how Driehaus has performed historically in its role as investment advisor to this specific strategy. The performance for the Emerging Markets Sustainable Equity Strategy is not the performance of the Fund and is not an indication of how the Fund would have performed in the past or will perform in the future. This material should not be viewed as a solicitation or offer of services by Driehaus. It is provided for informational purposes only. The information contained herein does not constitute an offer to sell or the solicitation of an offer to purchase any U.S. registered security or U.S. investment product.

Any performance data quoted represents past performance and does not guarantee future results. Performance figures are also shown for the MSCI® Emerging Markets Index (net Return, (“MSCI Emerging Markets Index”). The MSCI Emerging Markets Index is a trademark/service mark of Morgan Stanley Capital International. The MSCI Emerging Markets Index is a market capitalization-weighted index designed to measure equity market performance in 24 global emerging markets; is shown for illustration only; and cannot be purchased directly by investors. Benchmark index returns are not covered by the report of independent verifiers. The investment return and principal value of an investment will fluctuate so that the investor’s shares, when redeemed, may be worth more or less than their original cost. Any investor should consider the investment objectives, risks and charges and expenses of the Fund carefully before investing. The Fund’s prospectus and simplified prospectus contain these and other important information about the Fund. The prospectus should be read carefully before investing. Please email [london@heptagon-capital.com](mailto:london@heptagon-capital.com) for a free copy of these documents. Driehaus claims compliance with the Global Investment Performance Standards (GIPS®).

# INVESTMENT PHILOSOPHY & PROCESS

---

# DRIEHAUS EMERGING MARKETS SUSTAINABLE STRATEGY

## Competitive Edge

### Team

- **Experience:** 3 Portfolio Managers with 36+ years of Emerging Markets portfolio management experience at Driehaus.
- **Leadership:** Portfolio Managers own senior sector coverage responsibilities.

### Alignment and Incentivisation

- **Revenue share:** Team is highly incentivised to outperform with its own P&L and revenue share.

### Market Inefficiency

- **Market anomaly:** A differentiated philosophy and process exploits a persistent market anomaly driven by investors' behavioural biases.

### Investment Process

- **Market cycles:** Robust process has been tried, tested and proved consistently repeatable across multiple market cycles.
- **Growth profiles:** Strategy is diversified by different growth exposures.
- **Sustainability:** Strong ESG attributes relative to the benchmark.

# DRIEHAUS EMERGING MARKETS TEAM

The below employees at Driehaus are responsible for the portfolio management (including idea generation, portfolio construction, security selection, investment research and risk management) of the Driehaus Emerging Markets Sustainable Equity Fund.

Senior Trader

All analysts, including portfolio managers, have specific areas of expertise and/ or coverage responsibilities.

\* Also serves on the Firm's ESG Committee.

# DRIEHAUS EMERGING MARKETS SUSTAINABLE STRATEGY OVERVIEW

## What to expect

- Consistent and repeatable investment and risk management process
- Strong ESG attributes relative to the benchmark
- Investments in fundamentally sound companies undergoing positive change
- Manager engagement with companies on material ESG issues and sustainable proxy voting
- Diversification via different types of company growth profiles
- Macroeconomic analysis integrated into all aspects of the investment process
- Alpha contribution and risk reduction through security selection and active trading
- Lower volatility and downside market capture than the benchmark
- Alignment of interests

### Investment Approach

Clear and proven investment philosophy and process, integrating fundamental and macroeconomic analysis that exploits inefficiencies linked to company-specific and macro inflections. True emerging markets opportunity including off-benchmark exposure

### Investment Objective

The strategy aims to outperform, net of fees, the MSCI Emerging Markets Index

### Sustainability

Focus on companies with strong or improving ESG attributes and growth opportunities tied to social, environmental and/or governance solutions

### Investment Style

Bottom-up equity investment approach

### Portfolio Managers

Stable, experienced, proven three-person portfolio management team

- Richard Thies, Portfolio Manager, ESG Lead
  - 9+ years of emerging markets experience at Driehaus
  - Leads macro and financials coverage
  - Trained economist with microfinance background in sub-Saharan Africa
- Chad Cleaver, CFA, Portfolio Manager
  - 15+ years of emerging markets experience at Driehaus
  - Leads materials, energy and industrial coverage
- Howard Schwab, Portfolio Manager
  - 16+ years of emerging markets experience at Driehaus
  - Leads information technology and consumer coverage

### Benchmark

MSCI Emerging Markets Index

### AUM

- Emerging Markets Sustainable Equity Strategy 1: \$247m
- Total Emerging Markets Strategy Assets<sup>2</sup>: \$6,819m

### Diversification

Active conviction-based portfolio, generally fully invested with 80-140 stocks  
Position weights generally between 0.5% and 4%

<sup>1</sup> Emerging Markets Sustainable Equity Strategy assets include those accounts that meet the composite objectives and eligibility requirements. As of 30/06/2024.

<sup>2</sup> Total strategy assets include all assets managed in the strategy style. As of 30/06/2024.  
The Fund does not have a sustainable designated reference benchmark.

## I Driehaus Believes

### **Stock prices are driven by earnings growth and earnings revisions over the long-term**

- Companies with superior business models, growth potential and quality management teams generate superior long-term shareholder returns

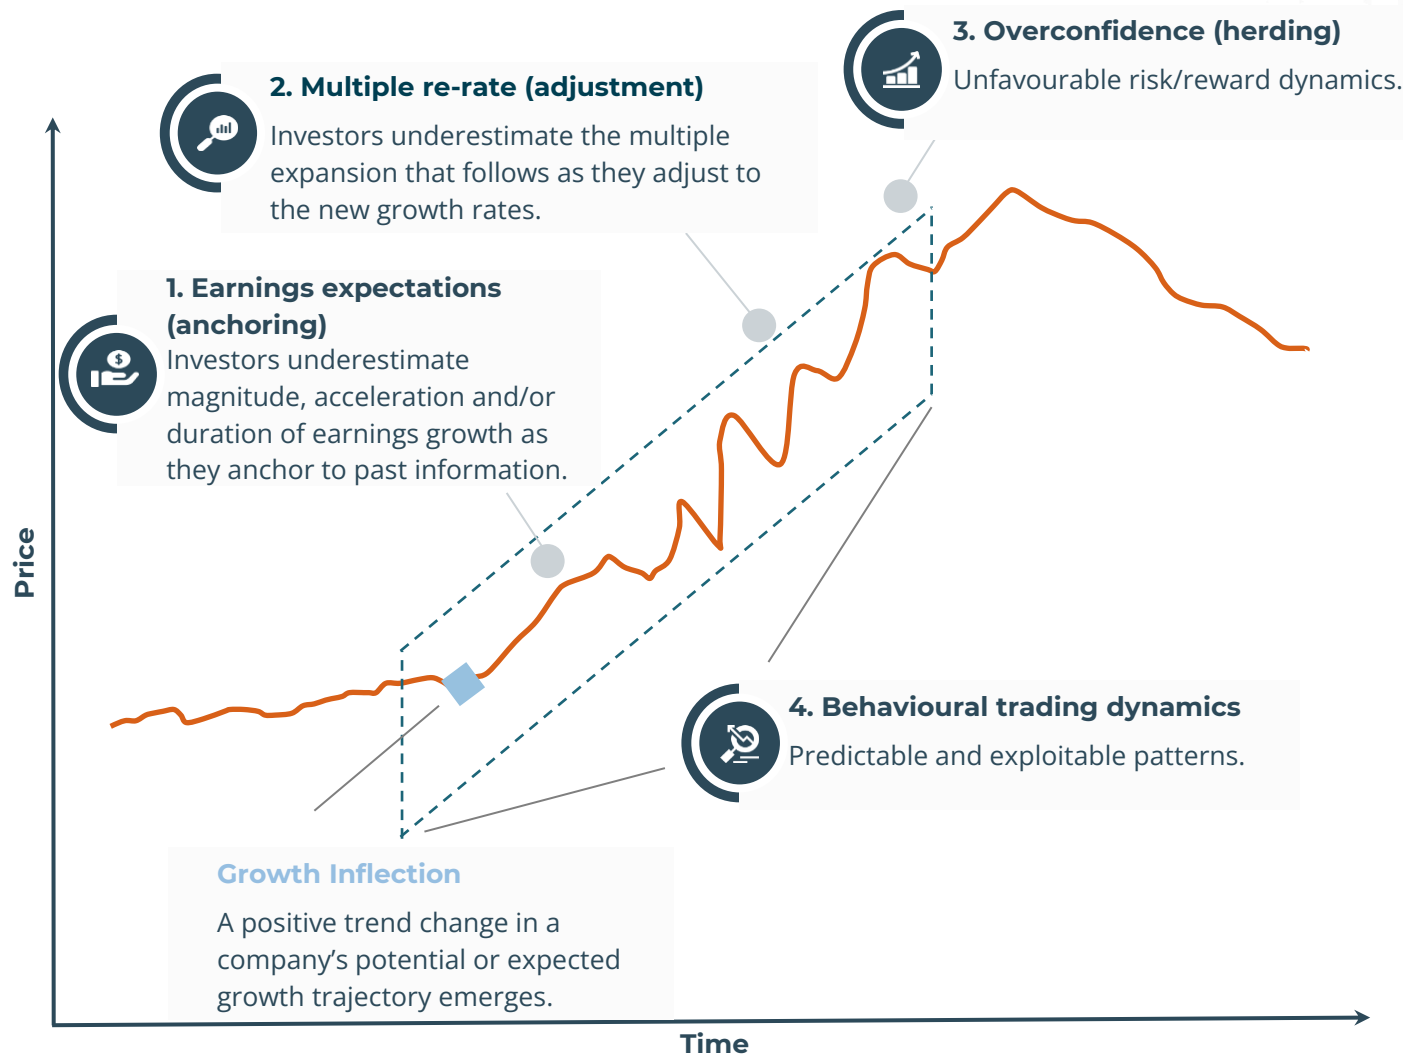

### **Fundamental growth inflections create inefficiency 'gaps' which enable alpha capture opportunities**

- These inefficiencies exist and persist due to investors' cognitive biases
- They follow predictable and exploitable patterns
- Identifying and capitalising on these inefficiencies at inflection points facilitates alpha creation

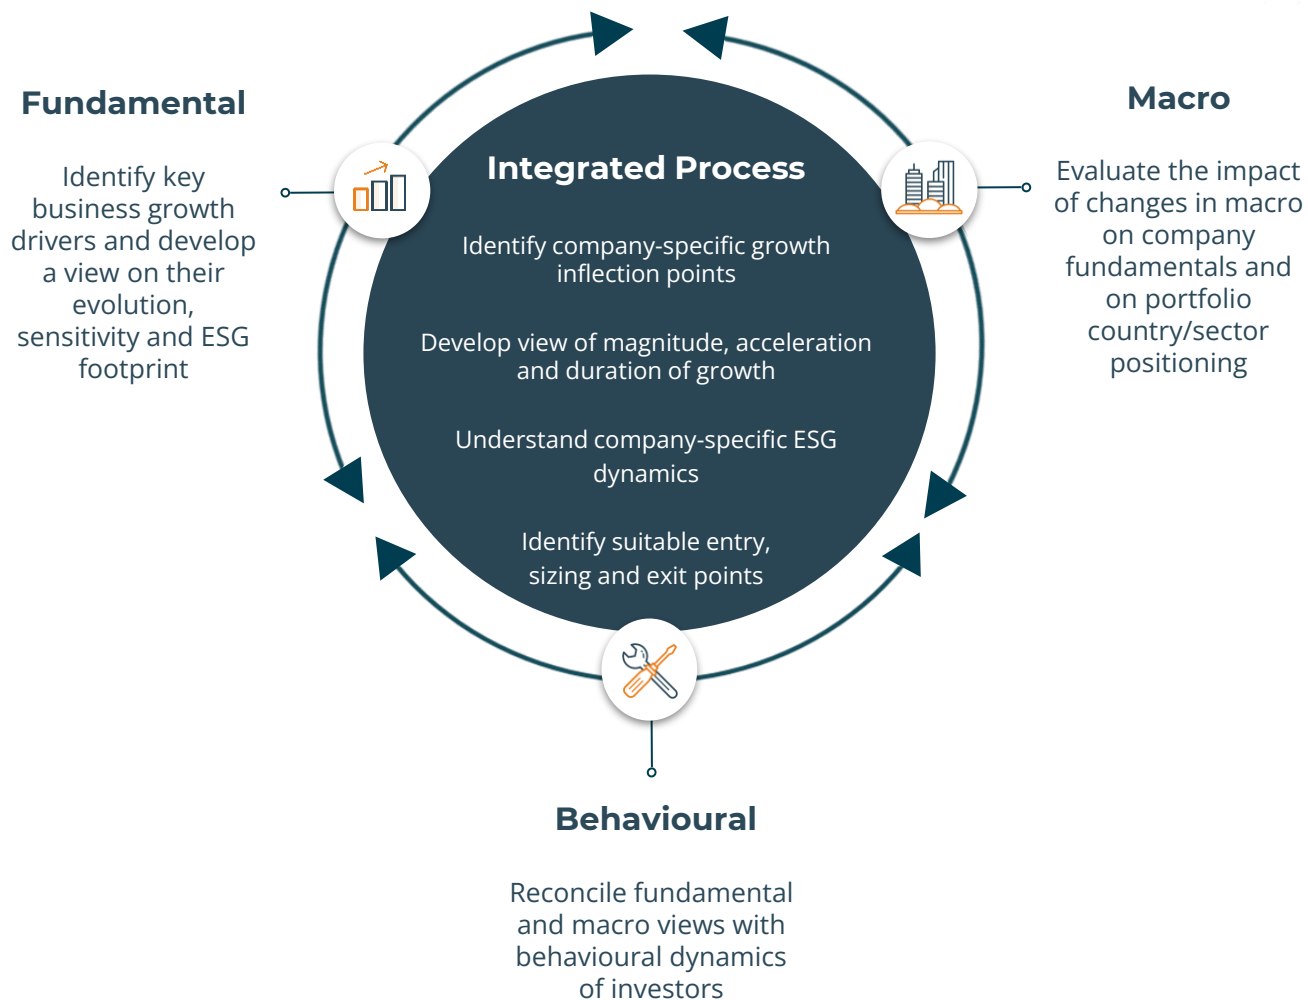

# INVESTMENT PHILOSOPHY

I Philosophy capitalises on a persistent market inefficiency.....

..... Inefficiencies follow predictable and investable patterns

## I The interplay of fundamental, macro and behavioural analysis.....

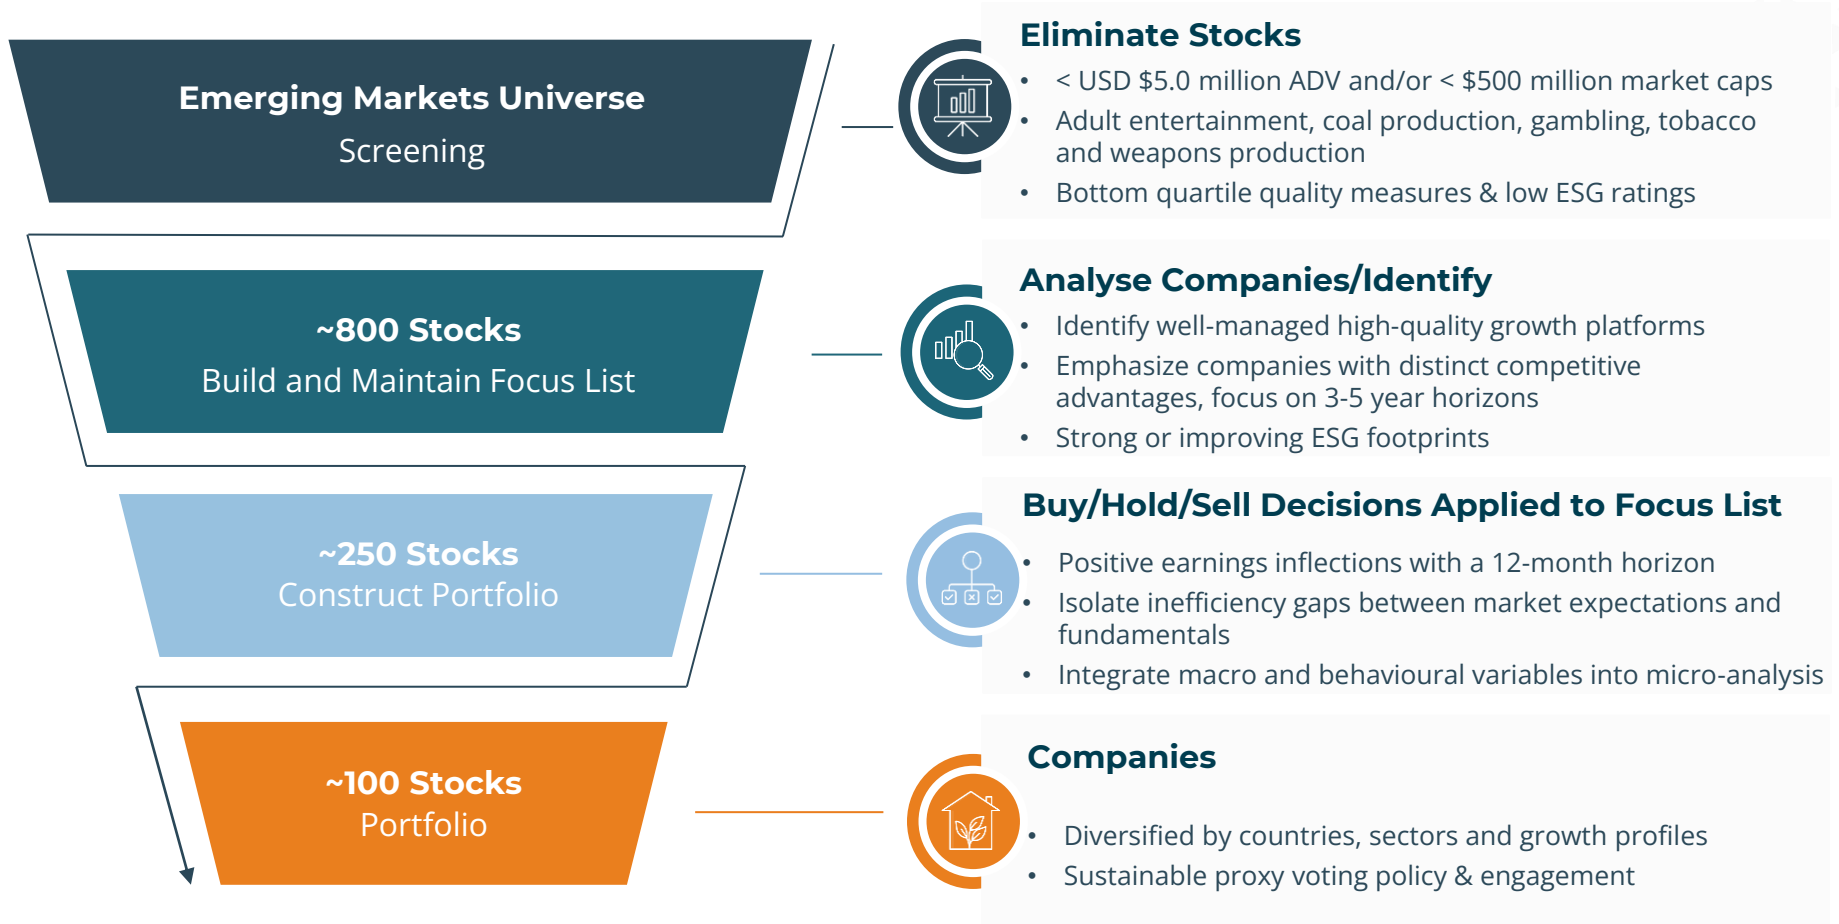

..... Provides a definable and repeatable edge

# INVESTMENT PROCESS OVERVIEW

A consistent and repeatable process that leads to a portfolio of emerging market companies undergoing positive change with strong ESG attributes.

## | Provides the building blocks for portfolio construction.

### | Focus List

- ~250 stocks diversified across region, sector, market cap and growth buckets (classifications). Each analyst covers 40-50 focus list companies.
- Low name turnover (<25%). Much of the portfolio turnover is opportunistic trading around focus list positions for the purposes of risk management, rather than adding or removing new stocks.
- A focus list company has a strong/differentiated business model, management quality, competitive position, and/or market opportunity.
- The investment team generally has extensive history/interaction with focus list companies, which explains the lower turnover rate of focus list companies.
- Focus list companies are fundamentally monitored on a continuous basis and frequently engage with management teams.
- Focus list companies have strong and/or improving ESG business practices relative to their sector peers.

### | Purpose

Eliminates approximately 80% of the investable universe leaving companies that exhibit the attributes of our investment philosophy and ESG preference

Increases the efficiency of our research effort and improves our ability to target and detect positive inflection points

Ensures that evolving ESG business practises and risks are well understood

Provides portfolio managers with well vetted eligible securities that serve as building blocks for portfolio construction (buy decisions applied to the Focus List)

# FUNDAMENTAL ANALYSIS

**I Driehaus develops company-specific investment theses with a defined research focus for specific growth profiles.**

## Dynamic Growth

Research focused on magnitude and acceleration of growth

- Disruptive business models and/or technologies
- Differentiated product or service
- Supportive demographic trends
- Underpenetrated market
- May offer improvements to major social and environmental problems

## Cyclical Growth

Research focused on magnitude and acceleration of growth

- Growth prospects linked to economic or product cycles
- Inflections tied to shifts in macro or industry conditions
- May be experiencing improving ESG business practices
- Earnings profiles may be more volatile/shorter term in nature

## Recovery Growth

Research focused on magnitude, acceleration and/or duration of growth

- Weakness in fundamentals deemed to be transitional and market expectations appear overly pessimistic
- Relative value opportunities deemed to be attractive in relation to growth potential
- May be experiencing improving ESG business practices

## Consistent Growth

Research focused on duration of growth

- Durable organic growth rates based on strong market position
- Attractive, defensible margins
- Strong management quality
- May trade at premium valuation as a result of sustainable competitive advantages
- Typically have relatively strong ESG attributes

**Result: A diversified focus list of fundamentally vetted companies with relatively strong or improving ESG business practices**

| Turnover is a by-product of new idea generation and risk management.....

## Buy/Hold Rationale

- High conviction that future earnings will exceed expectations
- Valuations are justified relative to peers and stock's history
- Macro and behavioural picture confirms investment thesis
- Attractive asymmetric return potential exists (security still likely mispriced)

## Sell Reasons

- Changes to the fundamental investment thesis
- Take profits
- Security is efficiently (or overly) valued
- Make room for new investment
- Macro and/or behavioural picture inconsistent with fundamental views

.....Avoid falling in love with stocks through unbiased sell discipline

# PORTFOLIO CONSTRUCTION

## I Bottom-up, conviction driven process.....

- Positions sizing is based on conviction
- Broad portfolio guidelines (see below) provide sensible diversification parameters
- Understand individual and aggregate risk factor exposure

Characteristic	Parameter	Rationale
<b>Cash</b>	Fully invested	Market timing conflicts with investment objective
<b>Position size</b>	Maximum 5% pts > index	Express conviction while minimising concentration risks
<b>Number of holdings</b>	~ 100	Sufficiently robust universe
<b>Country / Sector</b>	Maximum 15% pts > index	Express conviction while limiting country / sector risks
<b>Market capitalisation</b>	All capitalisation	Optimises universe
<b>Off benchmark holdings</b>	No limit	Optimises universe
<b>Growth Profiles</b>	Maintain exposure to Dynamic/Cyclical/Recovery Consistent	Enhances end market and risk factor diversification without sacrificing conviction
<b>Volatility</b>	No tracking error restrictions	Avoid closet indexing
<b>Key Risk Management Considerations</b>	Decompose expected tracking error Understand exposures/sensitivities Technical overlay	Accentuate idiosyncratic investments Avoid surprises Avoid biases

.....Understand the risks Driehaus are taking

# SUSTAINABILITY OVERVIEW

**I Driehaus seeks to identify companies with strong or improving ESG business practices relative to their sector peers.**

## Sustainability

- Focus on companies with strong or improving ESG attributes and growth opportunities tied to social and environmental solutions.
- Exclusions include involvement in adult entertainment, coal production, gambling, tobacco, weapons.
- Sustainable proxy voting and engagement to drive ESG improvements.

## Guidelines & Analysis

- Considerations which are used in our ESG analysis varies by industry and sector and may include:
  - Alignment with UN Sustainable Development goals;
  - Environmental and social reporting, disclosures and transparency;
  - Material environmental and/or social controversies;
  - Human rights considerations;
  - Environmental practices;
  - Board structure;
  - Transparency in financial disclosure and accounting policies;
  - Board and work force diversity;
  - Executive compensation;
  - Third-party ESG research from MSCI Inc., Sustainalytics and TruValue Labs; and
  - Expected improvement in ESG practices, factors and ratings

## Engagement

- Engage with company management on potential ESG concerns identified.
- Sustainable-focused proxy voting policy.

# ESG RATINGS

## Relative Portfolio Weight vs. MSCI Emerging Markets Index (%pts)

Higher ESG Quality

Lower ESG Quality

### Emphasize ESG Leaders and Improvers Over Laggards

Source FactSet Research Systems LLC, MSCI Inc. ESG Ratings, and Driehaus Capital Management LLC  
Portfolio and benchmark holdings are as of 30/06/2024 and represent the model Driehaus Emerging Markets Sustainable Equity Strategy account and the MSCI Emerging Markets Index.  
Cash is excluded.  
Companies without an assigned ESG rating by MSCI Inc. have been manually assigned a rating by Driehaus Capital Management LLC.

# ESG RATINGS

## Relative Portfolio Weight vs. MSCI Emerging Markets Index (%pts)

### Emphasize ESG Leaders and Improvers Over Laggards

Source FactSet Research Systems LLC, MSCI Inc. ESG Ratings, and Driehaus Capital Management LLC  
Portfolio and benchmark holdings are as of 30/06/2024 and represent the model Driehaus Emerging Markets Sustainable Equity Strategy account and the MSCI Emerging Markets Index. Cash is excluded.  
Companies without an assigned ESG rating by MSCI Inc. have been manually assigned a rating by Driehaus Capital Management LLC.

# RISK MANAGEMENT

Risk management process supports portfolio construction, quantifying exposures and sensitivities to minimise unintended outcomes.

## Understand Exposures

### Monitor sensitivities:

- Country / Sector / Currency / Security
- Style factors such as
  - Momentum
  - Volatility
  - Valuation
- ESG factors
- Analyse exposures on a relative, absolute and beta-adjusted basis
- Ensure appropriate portfolio diversification

## Understand Sensitivities

### Monitor exposures:

- Intra-portfolio correlations
- Country / Sector / Currency / Security
- Correlations, betas, volatilities

### Conduct / Analyse:

- Scenario Analysis
- Stress tests

Ensure awareness  
of significant  
active exposures  
and make certain  
that they are  
being consciously  
made

Risk management is integrated into every step of the investment process

**Idea Generation**  
Ensure liquidity

**Analysis**  
Validate investment theses

**Sustainability**  
Changes in MSCI ESG Ratings and Controversies systematically monitored

**Portfolio Construction**  
Optimise intended exposures

**Trading**  
Best execution

**Inv. Policy Committee**  
Multi-departmental oversight

**Compliance**  
Adherence to firm policies and obligations

## Cumulative Performance Since Inception

UCITS Fund AUM in USD Millions: USD 247m as of 30/06/2024

Source: Morningstar and BBH.

**Past performance is no guide to future performance and the value of investments and income from them can fall as well as rise.**

**Risk Warning:** The Fund is subject to special risk considerations including geographic concentration risk, portfolio concentration risk and operational risk. The investment return and principal value of an investment will fluctuate so that the investor's shares, when redeemed, may be worth more or less than their original cost. Any investor should consider the investment objectives, risks and charges and expenses of the Fund carefully before investing. Where an investment is denominated in a currency other than the investor's currency, changes in rates of exchange may have an adverse effect on the value, price of, or income derived from the investment. MSCI represents the MSCI Emerging Markets Index (net) USD. Please refer to important information on page 2.

**Risk Warning:** The Fund is subject to special risk considerations including geographic concentration risk, portfolio concentration risk and operational risk. The investment return and principal value of an investment will fluctuate so that the investor's shares, when redeemed, may be worth more or less than their original cost. Any investor should consider the investment objectives, risks and charges and expenses of the Fund carefully before investing. Where an investment is denominated in a currency other than the investor's currency, changes in rates of exchange may have an adverse effect on the value, price of, or income derived from the investment. MSCI represents the MSCI Emerging Markets Index (net) USD. Please refer to important information on page 2.

# APPENDIX

# BOTTOM-UP RESEARCH: QUANTITATIVE SCREENING EXAMPLE

**COMPOSITE** – This shows a stock's composite score relative to the EM universe combining the 4 key factors of quant work: quality, valuation, revisions and momentum. These four factors are emphasized because all have historically been shown to outperform over time.

**REVISIONS** – The revisions score shows the relative strength of a company's earnings revisions trend (1-month and 3-month) compared to the EM universe.

**MEDIUM-TERM MOMENTUM** – The blue+green lines show how medium-term momentum is evolving, while the noisy red dotted line shows short-term momentum (this is mainly used as a timing indicator for entry or sell points since short-term momentum tends to be a highly reverting factor).

**MSCI ESG RATING** – MSCI ESG Research provides quantitative scores based on in-depth research, ratings and analysis of the environmental, social and governance-related business practices of companies.

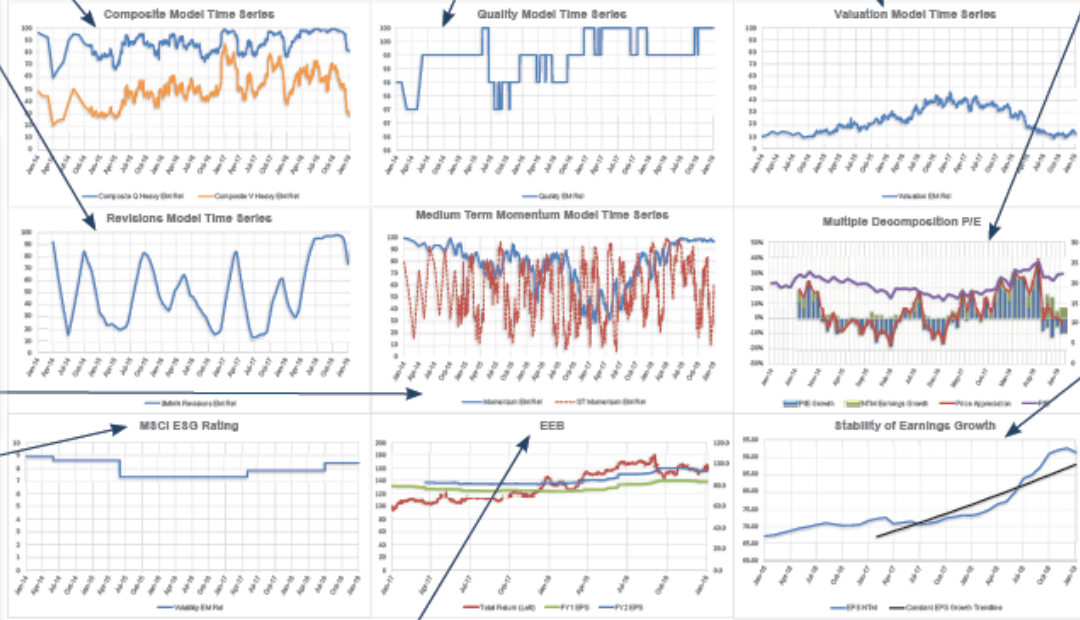

**QUALITY** – The quality score combines metrics such as profitability, cash conversion and leverage. This chart is helpful for not only showing where a company's quality stands relative to the universe, but more importantly how that quality is evolving. Deteriorating quality may be a sign of underlying fundamental deterioration in the business, while improving quality may suggest the inverse.

**VALUATION** – The valuation score combines metrics such as FCF yield, dividend yield, PE and price/book, and also looks at where current multiples stand versus history. This chart helps us understand not only how expensive or cheap a company is compared to the EM universe, but importantly where its relative valuation stands compared to its own history (since certain stocks such as healthcare and consumer staples will tend to always screen as expensive versus the universe).

Tata Consultancy Services Limited (B01NPJ1)

Tata Consultancy Services Ltd. is an IT services, business solutions and outsourcing organization. The firm offers consulting-led, integrated portfolio of IT and IT-enabled services which includes application development and maintenance, business intelligence, enterprise solutions, assurance services, engineering and industrial services, infrastructure services, consulting, asset leveraged Solutions and business process services. **EEB** – Using Best consensus estimates, it shows the trend in analyst earnings revisions.

**MULTIPLE DECOMPOSITION** – There is a lot going on in this chart but it shows how a stock has performed over the past month and what % of the performance was driven by earnings change versus multiple change. We want to see performance supported by earnings growth for the stocks we own, and look for opportunities to buy stocks where selloffs were purely multiple-driven.

**STABILITY OF EARNINGS GROWTH** – Shows the progression of a stock's next 12 months EPS with a "best fit" trend line. This provides an indication of how stable or volatile a company's growth is, and whether we are seeing any disconnect in current growth rate from trend (potential inflection).

## Proxy Votes Against Management – Summary Available upon Request

*Proxy voting in certain countries requires 'share blocking'. That is, shareholders wishing to vote their proxies must deposit their shares shortly before the date of the meeting (usually one-week) with a designated depository. During this blocking period, shares that will be voted at the meeting cannot be sold until the meeting has taken place and the shares are returned to the shareholders' custodian banks.*

*Driehaus generally prefers not to restrict the sale of any shares for proxy voting purposes and it is standard for Driehaus not to execute proxies for firms that are located in countries that practice share blocking.*

*Luxembourg is not a share blocking market, however, many securities are traded on the Belgian stock exchange where share blocking generally occurs*

# DISCLAIMERS

# DRIEHAUS EMERGING MARKETS COMPOSITE DISCLOSURE

Driehaus Capital Management LLC (DCM) is a registered investment adviser with the United States Securities and Exchange Commission (SEC). DCM provides investment advisory services using growth equity strategies to individuals, organizations, and institutions. The firm consists of all accounts managed by DCM (the Company). Prior to October 1, 2006, the firm included all accounts for which Driehaus Capital Management (USVI) LLC (DCM USVI) acted as investment adviser. On September 29, 2006, DCM USVI ceased conducting its investment advisory business and withdrew its registration as a registered investment adviser with the SEC. Effective September 30, 2006, DCM USVI retained DCM as investment adviser to these portfolios. DCM claims compliance with the Global Investment Performance Standards (GIPS®).

## COMPOSITE OBJECTIVES AND ACCOUNTS ELIGIBLE FOR THE EMERGING MARKETS GROWTH COMPOSITE

The Emerging Markets Growth Composite (the Composite) presented includes all unleveraged “emerging markets growth accounts” over which the Company exercises discretionary investment authority of both cash and equities using the same investment objective and philosophy. The Composite was created in January 1997. An account is considered to be an emerging markets growth account if it seeks capital appreciation by investing primarily in equity securities of rapidly growing companies in emerging markets countries around the world. This strategy may invest substantially all (no less than 65%) of its assets in emerging markets companies. Once an account has met the above criteria and is fully invested, it is included in the Composite in the next full monthly reporting period. Accounts that change investment strategies are transferred between composites in the first full monthly reporting period in which the account is managed under the new style. Terminated accounts are excluded from the Composite in the first month in which they are not fully invested as of the end of the month.

## PERFORMANCE RESULTS

Monthly composite returns are calculated as the sum of the monthly returns of each account weighted by the account’s beginning monthly value as compared to the Composite total. For periods prior to November 1, 2004, time-weighted account rates of return were calculated on a monthly basis and allowed for the effect of cash additions and withdrawals using the Modified-Dietz method. If a cash contribution or withdrawal exceeded 10% of an account’s value, the account was revalued and the return was calculated for the interim period. Effective November 1, 2004, account rates of return are calculated on a monthly basis by geometrically linking daily returns. Monthly composite returns are geometrically linked to determine annual composite returns. Net of fee returns reflect the payment of advisory fees and in some instances, other fees and expenses such as administrative and transfer fees while the gross of fee returns do not. Both are net of brokerage commissions charged to the accounts. The annualized rate of return is presented as the level annual rate which, if earned for each year in a multiple-year period, would produce the actual cumulative rate of return over that period.

For emerging markets growth accounts, valuations and returns are computed and stated in U.S. dollars. Since returns are stated in U.S. dollars, exchange rates were used in the conversion. The Company is not aware of any significant inconsistencies between exchange rates used in the Composite and those used in the benchmark indices. Securities transactions, which include brokerage commissions, are recorded on a trade date basis, and where information is available, income and expense items are recorded on an accrual basis. Returns are presented on a pretax basis and are net of any actual foreign taxes withheld on dividends and interest. Leverage is not a part of the Company’s investment strategy for this Composite. Securities are valued in the foreign currency in which they are denominated and then translated into U.S. dollars at the spot rate. Forward contracts are generally purchased to hedge the risk of the currency fluctuation between the trade date and the settlement date of the underlying securities transactions.

Past performance is not indicative of future results. All investments have risks and you could lose money. Other methods may produce different results and the results for individual accounts and for different periods may vary depending on market conditions and the composition of the account. Care should be used when comparing these results to those published by other investment advisers, other investment vehicles and unmanaged indices due to possible differences in calculation methods.

## INDICES

The performance results for the Composite are shown in comparison to indices. While the securities comprising the indices are not identical to those in any account in the Composite, the Company believes this may be useful in evaluating performance. The indices are not actively managed and do not reflect the deduction of any advisory or other fees and expenses. The Morgan Stanley Capital International Emerging Markets Index (MSCI Emerging Markets Index) is a market capitalization-weighted index designed to measure equity market performance in 22 global emerging markets.

# DISCLAIMER

This disclosure was developed using information from MSCI ESG Research LLC or its affiliates or information providers. Although Heptagon Fund ICAV information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the “ESG Parties”), obtain information (the “Information”) from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Further, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Heptagon Capital Limited, Heptagon Capital LLP and its affiliate companies and its members, officers, employees, agents and advisors disclaim any and all liability relating to these materials, except to the extent required by applicable law or regulations, including, without limitation, any express or implied representations or warranties for statements or errors contained in, and omissions from, these materials. Certain assumptions have been made, and/or parameters set, in the preparation of these materials which have resulted in the returns detailed herein, and no representation or warranty is made that any returns indicated will be achieved. Changes to assumptions or parameters may have a material impact on the returns detailed. This document should not be copied to any other person without our express consent. This document should not be considered an offer to buy or sell investments.

Heptagon Capital Limited has issued this communication as investment manager for Heptagon Fund ICAV (the “ICAV”), an umbrella fund with segregated liability between sub-funds (the “Funds”) and authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended, and is licensed to conduct investment services by the Malta Financial Services Authority. Heptagon Capital LLP is authorised and regulated in the UK by the Financial Conduct Authority and is the sub-investment manager for a number of the Funds.

The results given in this document are based solely upon historical fund performance as gathered and supplied by Brown Brothers Harriman Fund Administration Services (Ireland) Limited, the ICAV’s administrator, Refinitiv and Morningstar. That past performance has not been independently verified by either Heptagon Capital Limited or Heptagon Capital LLP. It is not intended to predict or depict the future performance of any investment.

The information contained herein is provided for informational purposes only, is not complete, and does not contain certain material information about the Funds, including important disclosures and risk factors associated with an investment in the Funds. Before making an investment in any Fund, prospective investors are advised to thoroughly and carefully review the ICAV’s [Prospectus](#) (the “Prospectus”) as well as the supplement to the Prospectus for the Fund and the Fund’s key investor information document with their financial, legal and tax advisors to determine whether an investment is suitable for them. An investment in the Funds is not suitable for all investors.

The distribution of information contained herein and the sale of shares in the Funds may be subject to legal or regulatory restrictions in certain countries in which applicants for shares are resident or of which they are citizens. In particular, neither the shares in the Funds nor the Funds themselves have been registered under any United States (“US”) Securities legislation and are not available for purchase by US persons (as defined in the Prospectus).

The Driehaus Emerging Markets Sustainable Equity Fund has been categorised as an Article 8 for the purposes of the EU’s Sustainable Finance Disclosure Regulation. The Driehaus Emerging Markets Sustainable Equity Fund promotes environmental and/or social characteristics but does not have sustainable investment as its primary objective. It might invest partially in assets that have a sustainable objective, for instance assets that are qualified as sustainable according to EU classifications but does not place significantly higher importance on the environmental objective of each underlying investment. Please see Prospectus and supplement for the Driehaus Emerging Markets Sustainable Equity Fund for further information on the Driehaus Emerging Markets Sustainable Equity Fund’s environmental and/or social characteristics and relevant sustainability risks and principal adverse impacts which may impact the Driehaus Emerging Markets Sustainable Equity Fund’s performance.
