- Alcohol
- Civilian firearms
- Gambling
- Mining
- Nuclear
- Oil
- Tobacco
- Weapons

The Fund integrates the below ESG strategies as an intrinsic part of the investment process.

MSCI ESG Rating

AA Fund: Heptagon Future Trends Equity Fund

A Benchmark: MSCI World

ESG Rating Distribution

MSCI rating data is no guide to future performance and the value of investments and income from them can fall as well as rise.

The definitions of the aforementioned ESG strategies are in accordance with Heptagon's sustainable investment framework. Please also be aware that third party data providers, such as MSCI, are used to support some aspects of the in-house research as well as for reporting purposes. Investors should therefore draw no specific inference between data provided by MSCI and the size of positions held within the Fund. The MSCI ESG ratings for the Fund are calculated by aggregating the ratings associated with each of the Fund's individual positions as of the reporting date.

Methodology

ESG Quality Score measures the ability of underlying holdings to manage key medium to long-term risks and opportunities arising from environmental, social, and governance factors. It is based on MSCI ESG Ratings and is measured on a scale of 0 to 10 (worst to best). The distribution of scores is based on the universe of approximately 28,000 funds included in MSCI ESG Fund Metrics.

ESG Ratings Distribution represents the percentage of a portfolio's market value coming from holdings classified as ESG Ratings Leaders (AAA and AA), Average (A, BBB, and BB), and Laggards (B and CCC).

Carbon Risk measures exposure to carbon intensive companies. It is based on MSCI Carbon Metrics and is calculated as the portfolio weighted average of issuer carbon intensity. At the issuer level, Carbon Intensity is the ratio of annual scope 1 and 2 carbon emissions to annual revenue. Carbon Risk is categorized as Very Low (0 to <15), Low (15 to <70), Moderate (70 to <250), High (250 to <525), and Very High (>=525).

Carbon Emissions - Scope 1+2 Intensity represents the company's most recently reported or estimated Scope 1 + Scope 2 greenhouse gas emissions normalized by sales in USD (t/USD million sales), which allows for comparison between companies of different sizes.

ESG Ratings Momentum represents the percentage of a portfolio's market value coming from holdings that have had an ESG Ratings upgrade, and those with a downgrade, since their previous ESG Rating assessment.

Reputational Risk represents the percentage of a portfolio's market value coming from holdings involved in very severe controversial events. It is based on MSCI ESG Controversies. Portfolio level Reputational Risk is categorized as Very Low (0%), Low (>0% to <1%), Moderate (1% to <5%), High (5% to <10%), and Very High (>=10%).

SFDR

This Fund has been classified as an Article 8 for the purposes of the EU's Sustainable Finance Disclosure Regulation ('SFDR'). The Fund promotes environmental and/or social characteristics but does not have sustainable investment as its primary objective. It might invest partially in assets that have a sustainable objective, for instance assets that are qualified as sustainable according to EU classifications but does not place significantly higher importance on the environmental objective of each underlying investment. Please see [Prospectus](#) for further information on the Funds environmental and/or social characteristics and relevant sustainability risks and principal adverse impacts which may impact the Fund's performance.

ESG Credentials

Signatory of:

PRI is a leading global network for investors who are committed to integrating environmental, social and governance considerations into their investment practices and ownership policies. Heptagon Capital signed the UN PRI on 10th July 2019.

FNG-label (the quality standard for sustainable investment funds in German-speaking countries) was awarded to The Heptagon Future Trends Equity Fund for the first time in 2021.

The Big Exchange (UK) – Silver Medal was awarded to the Fund in 2022. The Fund is considered by Square Mile's assessment to create a High Positive Impact. The assessment reviews ESG and wider impact-related corporate material on all stocks in the portfolio, for their impact in relation to specific positive social and environmental themes. Positive influence, impact reporting and stock selection were all key factors considered within the awarding process.

MSCI rating data is no guide to future performance and the value of investments and income from them can fall as well as rise.

Risk warnings

The Fund is subject to special risk considerations including geographic concentration risk, portfolio concentration risk and operational risk. The investment return and principal value of an investment will fluctuate so that the investor's shares, when redeemed, may be worth more or less than their original cost. Any investor should consider the investment objectives, risks and charges and expenses of the Fund carefully before investing. Where an investment is denominated in a currency other than the investor's currency, changes in rates of exchange may have an adverse effect on the value, price of, or income derived from the investment.
