What is this product?

Type: Undertakings for the Collective Investment in Transferable Securities (UCITS)
Product Term: Recommended minimum holding period: 5 year(s)
Objective: The investment objective of the Fund is to achieve long-term capital growth. The Fund uses a growth style of investment in US small-capitalisation companies within the same market capitalisation range as those included in the Russell 2000 Growth Total Return Index. The Sub-Investment Manager seeks out investments with good growth potential where investment decisions are based on the belief that fundamentally strong companies are more likely to generate superior earnings growth on a sustained basis and are more likely to experience positive earnings revisions. Investment decisions also involve evaluating a company's competitive position, evaluating industry dynamics, identifying potential growth catalysts and assessing the financial position of the relevant company. Investment decisions will also be based on an evaluation of the relative valuation of the company and macroeconomic and/or technical factors, such as economic growth, inflation and stock market volume statistics, affecting the company and its stock price. The Fund is actively managed which means the Sub-Investment Manager is actively making investment decisions for the Fund. The Fund measures its performance for comparative purposes against the Russell 2000 Growth TR USD Index ("the Benchmark"). However, when selecting investments, the Fund is not required to follow the composition of this index. Additional information is detailed in the Prospectus: https://www.heptagon-capital.com/documents/prospectus . The Fund's Depositary is Brown Brothers Harriman Trustee Services (Ireland) Ltd. The current share prices for the Fund may be obtained on Bloomberg, Morningstar, Thomson Reuters and Fundinfo.com.
Intended Retail Investor: The intended investor of this Fund should have basic knowledge of relevant financial instruments.

WHAT ARE THE COSTS?

The Reduction in Yield ("RIY") shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for two different holding periods. The figures assume you invest $10,000. The figures are estimates and may change in the future. The person selling you or advising you about this product may charge you other costs, if so, this person will provide you with interpretation about these costs and show you the impact that all costs will have on your investment over time.
